Print concentric rectangular pattern in a 2d matrix.

Let us show you some examples to clarify what we mean.

Example 1:

Input: A = 4.

Output:

```
4 4 4 4 4 4 4
4 3 3 3 3 3 4
4 3 2 2 2 3 4
4 3 2 1 2 3 4
4 3 2 2 2 3 4
4 3 3 3 3 3 4
4 4 4 4 4 4 4
```

Example 2:

Input: A = 3.

Output:

```
3 3 3 3 3
3 2 2 2 3
3 2 1 2 3
3 2 2 2 3
3 3 3 3 3
```

The outermost rectangle is formed by A, then the next outermost is formed by A-1 and so on.

You will be given A as an argument to the function you need to implement, and you need to return a 2D array.
